CHEMISTRY/GEOSYSTEMS

Chemistry Students will demonstrate an understanding of scientific and engineering practices by planning and carrying out investigations, interpreting, analyzing, and evaluating data, constructing and critiquing conclusions and explanations, obtaining, evaluating, and communicating information.

Geosystems This year you will learn about the Earth from its core to its surface, including its oceans, its land, and its weather. Through the knowledge you gain from this class, you will be able to understand our planet's systems, how they work together and how Earth fits into the solar system and the rest of the universe.
